

Total Productive Maintenance (TPM)

Course Overview

Total Productive Maintenance (TPM) focuses on getting managers, supervisors, maintenance personnel and equipment operators working together to improve productivity by drastically reducing unscheduled equipment downtime. Please find below a list of training topics typically covered in this two-day workshop. To help us better understand your organizations specific TPM training needs, we recommend a discussion with key personnel prior to the training. We can then tailor the course materials to maximize effectiveness. By the end of this workshop, you will be able to immediately apply what you have learned to help keep your organization's equipment up and running. Key training topics include:

- 5S – the basics of using 5S principles in TPM
- Visual Factory – How to create the visual system
- Maintenance Readiness – How equipped is maintained to respond
- Maintenance tracking – What systems are used to track maintenance response and uptime
- Defining wastes – How to identify waste by using a simple mapping processes
- Andon systems – Creating simple cost effective systems
- Quick Changeovers –identifying ways of reducing change over time
- Separating work of PM's – operator / maintenance pm
- Inventory Control – creating a parts usage matrix and KANBAN system
- Creating the PM schedule – how to establish and continuously improve
- Identifying gaps and leakage within the system
- Training – Operator, maintenance
- Sustaining the TPM system

Who Should Attend

This workshop is for anyone seeking to reduce unscheduled equipment downtime.
