

Transitioning to AS9100 Rev D

Course Overview

The revision to the AS9100 and ISO 9001 Standards has brought a renewed emphasis on the use of the process approach and risk-based thinking as organizing principles for a Quality Management System (QMS). In this workshop, you will learn how to leverage these principles to strengthen your organization's ability to satisfy customer requirements in the most effective, efficient and appropriate manner. Please note that AS9100D includes all of ISO 9001:2015 in its entirety. As such, you will learn about *all* the changes in the AS9100D and ISO 9001:2015 standards and be able to assess how this will affect your organization. On completion of this course, your knowledge of the requirements of AS9100D and ISO 9001:2015 will enable you to plan for the successful transition of your organization's Quality Management System.

How You Will Benefit

After completing this training course, you will be able to:

- *Identify the key differences between AS9100C and the new AS9100 Rev D standard, including how the ISO 9001:2015 changes were incorporated.*
- *Per the new requirements, define the context of your organization, including needs and expectations of interested parties, and the relationship to the organization's risks and opportunities*
- *Interpret the application of risk-based thinking, leadership and process management for your organization*
- *Describe the new requirements for organizational knowledge and documented information*
- *Understand the challenges associated with the reduced emphasis on documentation*
- *Create a model for your organization that shows how the process approach is (or could be) used for planning, supporting, operating and controlling processes as well as evaluating their performance.*
- *Describe the new operational planning and control requirements for product safety and prevention of counterfeit products, and how they relate to management of risk throughout the product life cycle.*
- *Identify gaps in your current Quality Management System using an ETI Group self-assessment tool.*
- *Create an action plan to transition your company to AS9100 Rev D and/or ISO 9001:2015*

Who Will Benefit

People involved in planning, implementing, maintaining and auditing Quality Management Systems based on AS9100 Rev D. The course is primarily focused on organizations currently certified to AS9100C and preparing to transition to the new standard. People interested in learning how to implement AS9100 Rev D from the ground up will also benefit from this course.

Course Prerequisites:

A basic understanding of AS9100C would be beneficial but not essential to attend this course.

Course Duration:

This course will take 2-days (16-hours) to complete.

Course Fees:

ETI Group can present this training program at your facility. Your cost, including workbooks for up to twelve people and travel will be \$3,600. Additional participants in this workshop, up to a maximum of sixteen people, will cost \$75 per person to cover the cost of the additional training materials. For more information please contact ETI Group.
