

Washington State-Funded Lean Six Sigma

Black Belt, Green Belt & Yellow Belt Training

Good Afternoon!

Thank you for your company's prior interest in Clark College / ETI Group's Washington state funded Lean Six Sigma training programs.

ETI Group is applying for a state funding grant to launch another Green Belt and Black Belt Lean Six Sigma training program in September 2024.

Thanks to a state funding grant, the total cost for the 96-hour Green Belt training program is \$95 per person, and the 144-hour Black Belt program is \$195 per person. A 90% discount from the regular cost for this training.

To minimize people's time away from the workplace, this training will be presented in two, half day training sessions every alternate week.

Although this training doesn't start until September 2024. We need to prepare and submit the Washington state funding application for this program in early April 2024.

If this training opportunity is of interest, please contact me before March 1, 2024, and I will send you detailed information.
