Design of Experiments

Course outline and page numbers

Tab 1 - Regression

1. Introduction to Regression.	1
2. Checking Model Adequacy	27
3. Using the Model: RMSE and Prediction Profiler	37
4. Introduction to the Prediction Profiler.	45
5. Multiple Regression	57
6. Dealing with Adequacy Issues	101
7. Simple Regression with Pass/Fail Y	127
8. Multiple Regression with Pass/Fail Y	141

Tab 2 - Design of Experiments

1. DOE Designed Experiments vs. File Cabinet Data.	1
2. One factor at a Time	17
3. DOE Terminology	27
4. Full Factorial Design	43
5. Statistical Assumptions	59
6. Statistical models	69
7. Design Principles	87
8. The Custom Design Process	99
9. Determining Sample Size for an Experiment	119
10. DOE Workshop	129
11. Experiments with Hard to Change Factors	131
12. Multiple Response Optimization	147
13. Screening Experiments	181
